

Climate Change Research Group

ABOUT US

The Climate Change Research Group is a research and consulting group of scientists, engineers and planners focused on supporting local, national, and regional policymaking in understanding and meeting the multiple challenges of economic development in the face of a rapidly changing global climate

OUR MISSION

To bridge the gap between science and policymaking on greenhouse gas mitigation and adaptation to climate change through integrated analysis, multi-disciplinary planning, and capacity-building

- ✓ Energy and climate change
- ✓ Food security assessments
- ✓ Public health co-benefits
- ✓ Coastal zone management
- ✓ Sea level rise assessments
- ✓ Regional atmospheric modeling
- ✓ Regional ocean modeling
- ✓ Project formulation
- ✓ Training programs (adaptation/mitigation)
